

E1®

alcosuisse

E1® – probably the purest ethanol worldwide

E1® - the flagship, high-end alcosuisse product that combines 100 years of tradition, savoir faire and passion in the ethanol business. E1® – exceptional quality specifically designed as a starting material for first-class cosmetic products (ointments, creams, lotions or tinctures), high-quality therapeutic products, foodstuffs and naturally also flavourings, fragrances and spirits.

E1® – the premium selection from alcosuisse for the most demanding customer requirements. Only the very best quality is selected for the high-end product, making E1® a combination of the most outstanding ethanol batches in the world. As part of the selection process, all ethanol deliveries to alcosuisse are subject to vigorous, multi-tiered testing, stringent separation according to product quality and purification. Following E1® classification, the selected batches are refined with further double filtration and additional purification (special 1µm filtration), and the strength is adjusted precisely to 94.0% by mass using purified water. The product is stored in a completely odourless and ethanol-resistant ethanol tank, and for delivery to clients it is filled into client containers specially designed for ethanol using specific stainless steel piping and a pump that are totally separate from the other product qualities.

E1® - our premium ethanol for your premium products.

E1® - top-quality ethanol

■ **Absolute purity and unique clarity – professional organoleptic selection**

Only ethanol made from cereals is selected

■ **Broad range of denatured variants**

Standard selection of 15 different denatured variants

■ **Additional quality labels**

E1® is produced according to alcosuisse sustainability guidelines

The main analysis values of E1®

Ethanol content	min. 94.0% m/m	Acid	≤ 10 mg/L
Acetaldehyde + acetal	≤ 5 ppm V/V	Benzene	≤ 1 ppm V/V
Methanol	≤ 60 ppm V/V	Residue on evaporation	≤ 10 mg/L
Appearance	Clear and colourless, 100% particle free	Other volatile impurities	≤ 40 ppm V/V
Organoleptics	very low		

Do you need the complete product specifications? We will gladly supply them.
